Accountability
Adaptability
Self-direct study
Problem solving
Teamwork

SOFTWARE

HTML
CSS
Bootstrap
JavaScript
Git
React

LANGUAGES

Spanish - Native
English - Intermediate B2

TOOLS

Chrome Devtools
Visual Studio Code
Slack

OBJECTIVES

Seeking a junior front-end developer role to expand my knowledge and skills while working on projects that challenge me to develop innovative solutions and enhance user experience.

Through my studies on Platzi, I have gained a deep understanding of front-end development languages such as HTML, CSS, and JavaScript. I have also honed my skills in using front-end frameworks like React, as well as familiarized myself with version control systems like Git.

As someone who values continuous learning, I find the onboarding phase of a job particularly exciting. I believe that investing time in this phase helps to reduce unnecessary discussions and disagreements, allowing me to focus on improving my skills and preparing for future projects.

During my studies, I had the opportunity to work on greenfield projects which allowed me to practice important skills such as rubber-ducking and dogfooding. These practices enabled me to develop a systematic approach to problem-solving, ensuring that I could effectively identify and create solutions for my personal projects. I believe that my experience in greenfield projects, coupled with my passion for continuous learning, makes me well-equipped to contribute to brownfield projects and add value to the team.

EDUCATION

Platzi

2021-CURRENT

WEB DEVELOPER

- Project based
- Peer learning
- Self-learning

SheCodes
